

SUBJECT: REPLACEMENT CONTROL ROD SUPPORTS WITH RETAINER SPRINGS

Beginning Serial # 1060440

All currently produced tractors after Serial # 1060440 will come with the new support rod holders installed.

New replacement control rod holder supports now have retainer springs to assist in keeping the PTO/Speed Control rods in place. These are compatible with all tractors except the 200 series. The support is universal, meaning there is one part number for either left or right. They can be installed "up & out" or "down & out" - see images above.

This part can be retrofitted to most BCS/Mainline two-wheel tractors.

Part # 55243340 (left or right)
NLA - Supersedes to 59243337

New Part # 59243337 (left or right)
