GUIDE TO OUT-OF-PRODUCTION TRACTOR COMPATIBILITY WITH CURRENT ATTACHMENTS

Use the chart below to identify the current tractor model to use as a basis for attachment compatibility. Please verify the tractor engine has not been replaced. If so, the horsepower rating of the replacement engine should be confirmed. Refer to Service Bulletin 1-8 for original engine specs of all tractor models.

Once you’ve identified the comparable current model, use the BUILD-YOUR-BCS Configurator on our website to find compatible attachments (start by clicking to Step 2 and selecting the appropriate tractor, then click back to see all compatible attachments), or use the Compatibility Chart found in the back of our printed brochure.

PRE-'95	OUT-OF-PRODUCTION TRACTOR		CURRENT MODEL WITH COMPARABLE ATTACHMENT COMPATIBILITY		PTO ADAPTER REQUIRED	*COMPATIBILITY NOTES
	MODEL	HP	MODEL	HP		
x	602	5/6*	620	8	92290832	30/40" Sickle, 22" Lawn Mower, 21" Brush Mower
