

GARMENT CARE MANUAL

Full Cool

Hand
wash

Do not
bleach

Do not
iron

Do not
dryclean

Hang
to dry

To care for Full Cool garments, machine wash cold on a gentle cycle using mild detergent or a specialized textile cleaner such as Molecule Apparel Wash, available in 4 oz or 16 oz bottles from Helmet House or a local dealer. Avoid bleach, ironing, and tumble drying. Always hang to dry naturally. For optimal maintenance between washes, consider using Molecule Apparel Protector and Molecule Apparel Refresh. These products help keep your garments looking sharp, lasting longer, and smelling fresh.
